

BENEFITS OF FEEDING ADVANTAGE EDGE XCELERATOR PELLET

- Scientifically designed to include protected fat and protein sources plus essential Omega-3s.
- Superior digestibility and palatability
- Positive immunity rates
- Increased performance
- Reduced Inflammation
- Reduced lactic acid levels and heart rate

There was a trend for fish oil-supplemented horses to have lower PGE₂ in their joints compared to control horses. PGE₂ concentrations have been reported to be higher in the joints of horses with existing osteoarthritis compared to levels in normal, healthy joints.

Colorado State University (Ross et al 2011)

DIRECTIONS FOR USE

- Feed at a rate of one pound per head per day, up to one and one half pounds per head per day.

ADVANTAGE EDGE XCELERATOR PELLET

Advantage Edge Xcelerator Pellet is a horse supplement that promotes enhanced performance.

It contains fish oil, extruded flaxseed, stabilized rice bran and the essential oils needed to increase your horse's energy and stamina, while lowering lactic acid levels and heart rate during exercise.

INGREDIENTS THAT MATTER!

FISH OIL

Polyunsaturated fatty acids provide an excellent source of EPA and DHA in proportions that help provide the best physiological results.

There is evidence that Omega-3, EPA and DHA can provide general antioxidant benefits for equine health. Trials have shown a reduction in blood viscosity (reduce packed cell volume), lower heart rate and improved oxygen flow to muscles, thereby helping to reduce muscle damage in performance horses.

Kentucky University (O'Connor et al 2004)

PROVEN PALATABILITY

The combination of ingredients in Advantage Edge Xcelerator Pellet have been proven to increase palatability, thus allowing your horse to get the benefit of these ingredients without the challenging flavor and smell that usually accompanies fish oil.

STABILIZED RICE BRAN

The fat found in rice bran supplies a highly digestible and safe form of calories to the diet. Because fat contains more than twice the energy than carbohydrates do, it is an extremely efficient source of energy. Fat does not cause the hormone spikes that can lead to excitability, keeping horses calm and focused on their work.

IMMUNE HEALTH

Proper nourishment results in better immunity. Dry extruded flaxseed, alfalfa and peas provide a stable, protected source of land-based essential Omega-3 fats and proteins.

OMEGA-3 BENEFITS

- Essential nutrients for the diet
- Reduce inflammation
- Promote a healthy, glossy coat
- Maintain pain-free, supple, mobile joints
- Maintain good circulation and a healthy heart
